The Whereabouts of the Zürich Archives

- Waldmeier claimed that all original [raw] observations by both the Zurich and 'Foreign' observers are kept in the Archives of the Zürich Observatory
- My inquiries at the Library of the ETH about the Archives have had no success
- ETH claims that there are no Archives in their possession
- The Microfiches with the Zürich Data do not include any material after the year 1937 [which is the year Waldmeier began as assistant]
